Designed for Resilience

Multi-link strategies ensure maximum uptime:

Fibre + Wireless

Fibre + LTE

Wireless + Satellite

Automatic failover & load balancing

UNCAPPED LTE BROADBAND

LICENSED SPECTRUM 5G

CAPPED LTE LEO DEDICATED

GEO UNLICENSED SPECTRUM

Business Wireless

Best for

Fibre-challenged sites, rapid deployment

Why it works

- Fast to deploy, carrier-grade reliability
- Licensed & unlicensed spectrum options
- High-throughput, low-latency links
- Ideal for last-mile or site-to-site links
- Engineered for redundancy and failover
- Short lead times vs fibre builds

Value

Enterprise performance without long civil works.

LTE / 5G

Best for

Backup links, pop-up sites, mobility

Why it works

- Always-on resilience
- Rapid activation with business-grade SIMs
- Static IP options available
- Smart routing & automatic failover
- Ideal as secondary or tertiary link
- Supports voice, VPN, and cloud access

Value

Cost-effective continuity when primary links fail.

Fast. Reliable.
Always-On.

Business Data Connectivity That Powers
Your Operations

What We Offer

Nationwide Coverage

Serving urban and remote areas across South Africa

Custom Solutions

Tailored packages based on speed, usage, and location

Full Installation & Support

From infrastructure rollout to after-sales support.

Performance Monitoring

Proactive management to maximise uptime

Business-Grade SLAs

Guaranteed speeds, availability, and response times

Pricing Starting From

30Mbps - R699

Add Ons

Hosted PBX
Voice Services
WiFi & Captive Portal
Content Blocking
Cloud Back-up Services

Business Fibre

Best for

Offices, campuses, high-usage environments

Why it works

- Speed, stability, and low latency
- Dedicated, uncontended bandwidth
- Speeds from 10Mbps to multi-gigabit
- Low latency for voice, cloud & SaaS
- SLA-backed with proactive monitoring
- Ideal for Hosted PBX, call centres, VPNs

Value

Predictable performance for mission-critical operations.

Satellite Connectivity

Best for

Remote, rural, or hard-to-reach locations

Why it works

Coverage where nothing else can

- National and cross-border reach
- LEO options for lower latency
- Reliable connectivity for remote teams
- Integrated with terrestrial failover
- Fully managed installation & monitoring

Value

Business connectivity without geographic limits.

Best for

- Corporate & Professional Services
- Retail & Hospitality
- Logistics & Warehousing
- Manufacturing
- Rural Retail
- Production Farming

Why Use SPOC

- Single point of contact for all connectivity
- Vendor-agnostic, best-fit designs
- Proactive monitoring & support
- Scalable from single site to multi-branch
- Built for voice, cloud, and security

Smarter connections. Stronger business.
